Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, 23-31 and 36-41, drawn to a receptacle, classified in class 439, subclass 652.
 - II. Claims 13-22 and 32-35, drawn to a plug, classified in class 439, subclass 176.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, in Group I claims the receptacle and Group II claims the plug:
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. A telephone call was made to Gregory Lavgorgna on 9/28/04 to request an oral election to the above restriction requirement, but did not result in an election being made. Any inquiry concerning this communication or earlier communications from the
